25X1

1. The following air activity was observed at Finow airfield between 8 and 12 March 1954:

8 March. Between 8 a.m. and 3 p.m., there was air activity by swept-back jet aircraft with about 15 take-offs and individual flights observed over the field. Two MiG-15 or U-MiG-15s were seen engaged in stunt flying.

9 March. Between 9 a.m. and 3 p.m., aircraft practiced flying individually and in elements of two. The firing of aircraft weapons was heard from the direction of Werbelinsee. The weather was sunny as on the preceding day.

10 March. During the morning, flying was practiced by swept-back jet aircraft. The sky was lightly clouded. About 2 p.m., 30 MiG-15 or U-MiG-15s took off in rapid succession; although no siren was heard, the take-offs resembled a scramble.

11 and 12 March. No air activity was observed and the weather was hazy and rainy. 1
